

S2 车身大梁钣金整修系统 Auto Body Collision Repair Systems

气动控制系列

Pneumatic Control Series

选配部件/Optional parts

技术参数/Technical parameters

工作台长度	
Working platform length.....	5500mm
工作台宽度	
Working platform width.....	2200mm
工作台高度	
Working-platform-height.....	300—800mm
液压系统最大工作压力	
The max working pressure of hydraulic system.....	70MPa(10000psi)
塔柱油缸最大举升力	
The max lifting force of the tower cylinder.....	95KN
塔柱牵引工作范围	
The pulling range of the tower.....	360°
动力气源压强	
The pressure of the air source.....	0.6~0.8MPa
最大举升重量	
Max lifting weight.....	5000kg
设备总量	
Equipment gross weight.....	3200kg
动力单元电压	
Power Unit Voltage.....	220V/380V
电动泵功率	
Electric Pump Power.....	2.2KW

实物出厂以出厂配置单为准，参数等如有改动，恕不另行通知
No notice for changed physical object and parameters, etc.

- 平台宽阔，面板经大型数控下料一次成型，切口光滑，无受热变形。
- 所有部件经抛丸处理，消除焊接应力，增强表面强度，油漆附着力高。
- 平台采用国标优质钢板经二氧化碳气体保护焊拼焊而成，强度高、刚性好，工艺孔多，可方便布置锚定机构。
- 塔柱360度作业，自由灵活，油缸垂直工作，动作强劲、准确。
- 精心设计的液压系统，动力强劲，使用寿命长，故障率低。
- 多种高精度的测量系统可供选配，配合最新车体数据光盘及详细设备使用说明书，方便车辆维修。
- 平起平落结构可方便调整平台高度，设计更具人性化。
- 优质链条（T8级）及锻造钣金工具（45#钢），使用灵活、方便、寿命长。
- 强度部件如塔柱导向环、主夹具底座、上压盖板均采用整体铸造，受力分布均匀，不易变形。
- 通用主夹具快速、准确地对汽车进行定位和夹紧，另有奔驰、宝马、沃尔沃、本田等多种专用夹具供您选择。
- 适用于中、小型面包车及轿车的维修作业。

- The platform is broad with its panel formed by the large-scale CNC cutting machine from a single cut. The notch is smooth with no heat deformation.
- All parts are treated with shot blasting to eliminate welding stress and increase surface strength, which improves the painting adhesion.
- The platform is spliced with national standard and high quality steel plate through carbon dioxide welding with high strength, good rigidity, and more process holes for anchoring parts mounting.
- The towers are 360°movable, freely and flexibly, the cylinder works vertically without any components forces consumption, powerful and accurate tensile force.
- Hydraulic system with good design is powerful and gives it a long useful life and low failure rate.
- Various measuring systems with high accuracy can be selected. Newest boy data manual composed of various models of cars are attached, easily accessible during maintenance.
- More humanized design of equal-rise and equal-fall structure makes it easy to adjust the height of the platform.
- High quality chain (T8) and forged sheet metal tools (45#) are easy and convenient to operate with long service life.
- Strength needed parts like tower guiding ring, main clamp support and tower rear coverplate adopt inblock cast to ensure high strength and deformation resistance.
- The principal clamp can fix position and clamp the cars rapidly, accurately, and firmly and many clamp such as benz, bmw, Volvo, and Honda you can select.
- Appropriate for operating maintenance of medium or small and cars.
