TOUCH ALLOWS MEASURING OF

- VEHICLE FRAME AND STRUCTURAL ITEMS
- MECHANICAL PARTS
- USER ADDED POINTS WITH PHOTOS
- WHEEL AND TIRE ALIGNMENT
- SUSPENSION PARTS
- COMPARATIVE MEASUREMENTS

Touch

The Electronic Measuring System

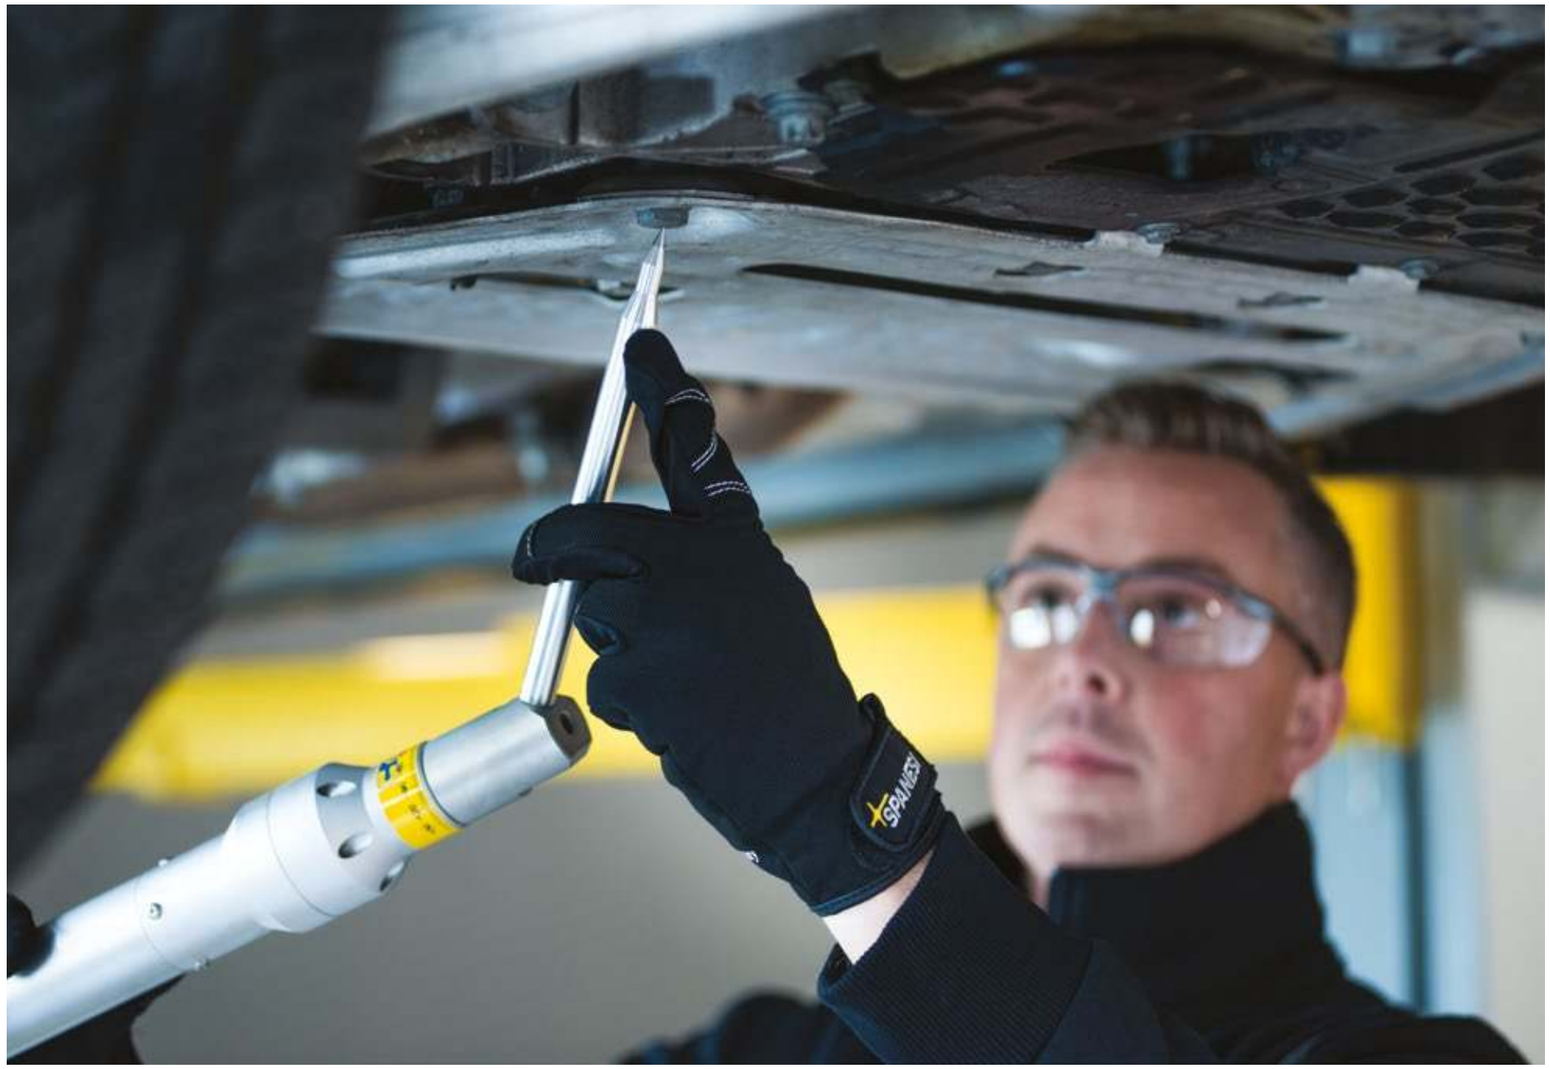

Damage diagnostics

The initial evaluation of the damaged vehicle is the first step of the repair process. Repair diagnostics can be performed on any lift, bench, or surface.

Detailed pre-repair documentation shows the extent of the damage and the structural operations necessary to return the vehicle to OEM specifications.

Complete repair documentation

The Touch provides a complete set of post-repair documents. The technician and customer can be confident that the vehicle has been returned to OEM specifications.

VEHICLE FRAME AND STRUCTURAL ITEMS

FOCUS POINTS

01 _____
UNIVERSAL
Measuring any vehicle on any bench, rack or lift

02 _____
MEASURING IN MINUTES
Fast measuring setup

03 _____
INTUITIVE USER EXPERIENCE
Exclusive Wintouch software

04 _____
ACCESS CHALLENGING MEASUREMENT POINTS
Multiple probe and extensions

05 _____
ACCURATE
Exact measuring

MECHANICAL PARTS

The diagnostic measurements can be completed with mechanical parts on or off of the vehicle.

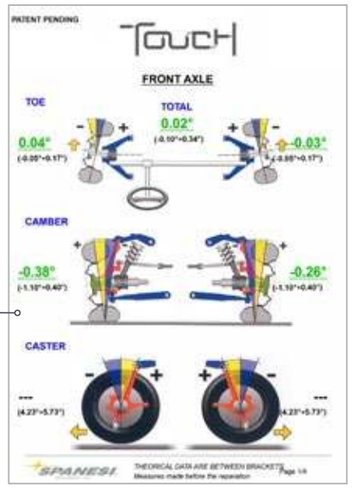

WHEEL ALIGNMENT

90KTIRD010 | Follow-me tool (option)

The “follow-me” tool provides instantaneous measurements displaying point deformation and guides the technician, in real-time, during damage repair operations.

90FERMT010 | Touch mount for 100 series benches and Daytona (option)

90SPESS010 | Touch mount for Multibench, Minibench and Ponybench BT Plus (option)

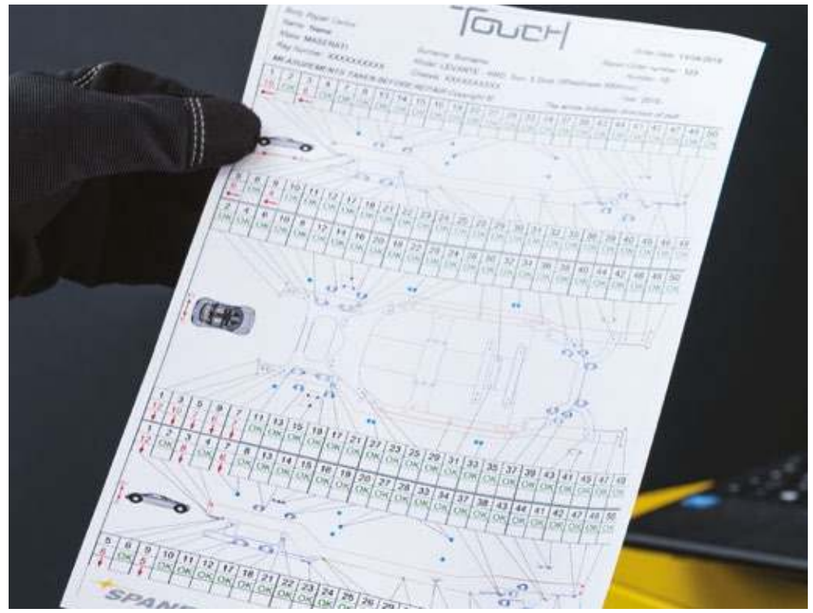

WINTOUCH SOFTWARE

Extensive Database

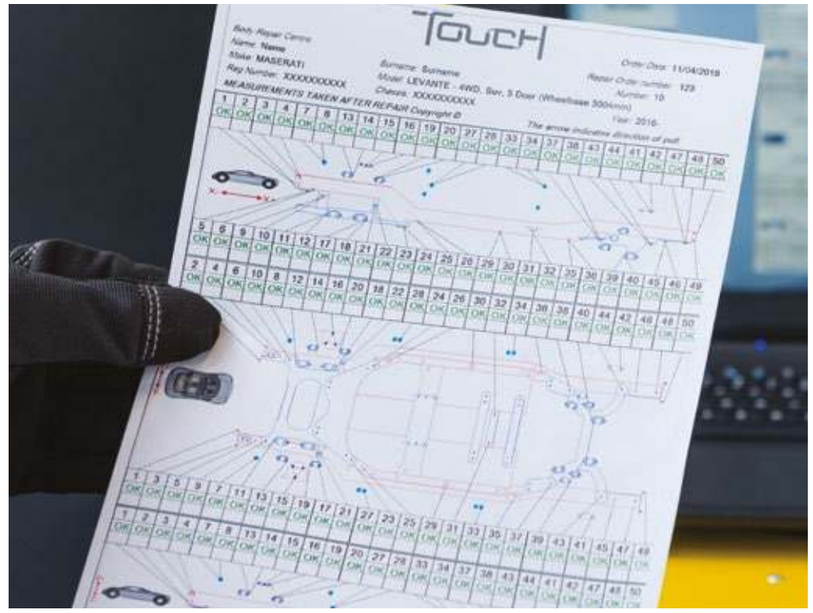

Spanesi has invested heavily to provide the latest and most comprehensive database of vehicle data available anywhere. New vehicle updates are available directly from the Spanesi website and major updates are issued every six months.

While measuring vehicles, the WinTouch software guides the user with the help of measuring point location images and intuitive sounds that clearly indicate the good from damaged locations.

The WinTouch software creates both pre- and post-repair documentation, which are easy to understand by the technician and customer, ensuring the vehicle has been repaired back to OEM specifications.

TOUCH 4.0

Stylish and sleek design

The latest Touch design takes its cues from the “Spanesi 360° Concept”. Sleek, clean and elegant lines set this measuring system apart from the pack.

This visionary trolley contains all the accessories necessary for vehicle measuring, with a compartment for the PC and another for the printer.

Touch system includes

- TOUCH ARM
- TROLLEY VER 4.0
- TRANSPORTATION CASE
- BLUETOOTH KEY
- POWER SUPPLY
- EXTENSIONS
- 3 PROBES (100-200-350mm)
- PROTECTIVE COVER

Computer area

Probe area

TOUCH PORTABLE

Power in a small package

The Touch “Portable” trolley is light, compact and requires a small footprint in a collision repair facility. Transportation is effortless as the smaller trolley easily fits in a vehicle.

All accessories are handy and have their own fixed location for easy access.

Touch system includes

- TOUCH ARM
- PORTABLE TROLLEY
- TRANSPORTATION CASE
- BLUETOOTH KEY
- POWER SUPPLY
- EXTENSIONS
- 3 PROBES (100-200-350mm)
- PROTECTIVE COVER

Printer area

Computer area

TOUCH WHEELS

The Touch Wheels kit provides camber, caster and toe angle measurements without the need to purchase additional accessories.

Wheel and tire alignment

Touch Wheels checks vehicle alignment to necessary to complete 360° vehicle damage diagnostics.

Without the need for lifts or benches, Touch Wheels performs vehicle alignment checks on the ground.

TOUCH BIKE

Damage analysis can be conducted with mechanical parts installed or removed and without the use of a lift.

Bike measuring

3-dimensional measuring of bikes and motorcycles is simple with Touch Bike. Diagnose both the assembled bike, just the chassis with or without the mechanical parts included.

Database updates are released annually.
